

The Middle School Girls Basketball season concluded this past weekend, with the girls winning the championship at the season-end tournament hosted by Seneca. The teams earned a combined record of 22-14. The winning record is attributed to the hard work and dedication of these 12 girls. The team overcame limited numbers, with a significant number of girls playing up in competition. With each loss came new development opportunities. The team matured throughout the year, overcoming losses to Fairview and Fort LeBouef, to beating every team in the region at least once. The girls finished the season winning 8 of their last 10 games before sweeping the tournament. The team outlined goals at the beginning of the season and with each opportunity, the team came back more focused and driven. Each player put work in, increasing their skill set throughout the season and coming together to finish the season as Champions!

Congratulations to 2022 Champions, North East Girls Basketball
